

Laser Marking Machine Application

Advantages :

- All fiber MOPA, mirror-free design, high stability for optical power output
- Air-cooled, low maintenance, anti-dusting, wide adjustable laser frequency range
- Peak power up to 25kW, pulse width as short as 30ns, minimum focal spot size around 30 μ m

Applications :

- Metal surface marking (color marking, blackening & white marking)
- Ceramic substrate/carbon /plastic marking
- Metal cleaning
